Solutions for IBM Rational DOORS®
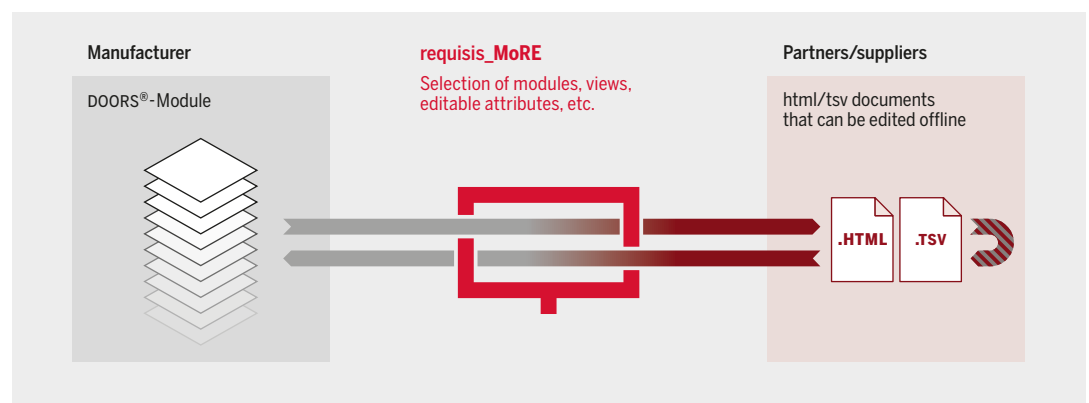

Mobile Requirements Editor: View and edit DOORS® modules offline using your browser.

🖥 requisis_MoRE   EVEN EASIER OPERATION

IBM Rational DOORS® is one of the most important applications for state-of-the-art requirements management for systems and professional IT applications. With our tried and tested Mobile Requirements Editor *requisis_MoRE* you can view and comment on DOORS® data while on the go and afterwards synchronize it with DOORS®.

Manufacturer	requisis_MoRE	Partners/suppliers
DOORS®-Module	Selection of modules, views, editable attributes, etc.	html/tsv documents that can be edited offline

.HTML .TSV

THE SOLUTION

requisis_MoRE is the ideal additional component if you want to view and comment on DOORS® data while on the go. Offline use does not require complicated preparations – no local installation is necessary for tasks like review sessions or test executions. Any user can easily complete an export in just a few minutes with no preparation required. Simple configuration and quick export as an html file save valuable time. Thanks to numerous new features, operation is very similar to DOORS®.

You can select DOORS® modules and views to to determine what should be exported for offline work. The HTML files created can be viewed using any conventional browser and an be edited on any PC without having to install any special software. Advantages over document export: *requisis_MoRE* allows you to navigate between linked requirements.

requisis_MoRE displays attributes that can be edited in fields via which the user can change the values. Changed values such as review comments and test results are stored in a TSV file and can easily be re-imported into DOORS® later. This hugely improves efficiency during day-to-day work with DOORS®. *requisis_MoRE* saves you time and protects your investment because you can call it up from your own DXL extensions and integrate its functions into processes and existing DOORS® extensions.

requisis_**MoRE**

AREAS OF APPLICATION

> Mobile, modular and complete DOORS® data with links
> Integration of partners and employees without DOORS®
> Allows editing without connection to the database
>   – Mobile test execution and logging
>   – Mobile review sessions and requirements commenting
> Offline collaboration with suppliers without DOORS®
> Entry of test results possible regardless of location
> Increased efficiency due to comprehensive, mobile and complete DOORS® data
> Travel time can be used for reviews

FEATURES AND ADVANTAGES

> Reviews that are easy to perform increase motivation
> Increased quality due to regular reviews
> Easy export set selection (modules, views, baselines)
> Direct export from DOORS®
> Display and navigation using DOORS® links
> Learning how to use additional tools is not necessary
> Edit data directly in the browser
> Reimporting data is simple
> Ad-hoc exports without involving a DOORS® Admin
> OLE objects also exported as a Word file
> Function integration in your own DOORS® extensions using API
> Customizable style sheets

NEW FEATURES

> Even better ease of use
> Navigation tree on the left-hand side
> All columns can be hidden/shown
> Column size can be adjusted individually
> The colors used for enumeration values are retained during export
> Column headings always visible at the upper edge of the window
> Deleted objects can be exported and suitably displayed if necessary (if visible in view)
> Improved presentation of module attributes

requisis *Outstanding in Engineering*

REQUISIS is synonymous with efficient requirements engineering and the development of custom business applications. Major German auto makers and automotive suppliers rely on our know-how. Operating out of offices in Berlin and Stuttgart, the company maintains a nationwide footprint to provide requirements management, project support, process optimisation and software development services with cutting-edge expertise. The spectrum of deliverables is complemented by effective training programs.
